I am writing in support of the Des Moines Lake Application for a Surface water grant. De Moines lake would like to buy and install a Hot water pressure washer to help curb the influx of invasive species into the lake. These hot water pressure washers have been proven to be highly effective in the war against Zebra Mussels as well as other invasive species. Keeping these out of our waters is extremely important to the quality of our lakes. The future of our county is dependent on keeping our waters clean and viable.

Thank you,

Tim Adair
President Burnett County Lakes and Rivers Association.
