Thanks Dan for getting back to me. The permit questionnaire indicates that we do not need a permit. While we have permission from the township for the decontamination station, we will make sure to have them also approve the removal of water.

Thanks!

Be sure to obtain permission from the township if this is a Town landing.

Dan,

I received your information from Jason Towne of Burnett County as he pointed me in your direction.

Our lake association was just approved for a DNR grant to implement a water decontamination station at our boat landing for Des Moines Lake. The system involves above grade water tanks that will need to be filled with water to supply the system.

Question for you regarding water withdrawal from Des Moines Lake...do we need a permit? We are estimating around 12000 gallons per year.

Thank you for your time and call me at 612.823.8752 if a phone call is better for you.

Ryan Knox

Des Moines Lake Association
